🎓 EDUCATION

Edappally, Kochi   **Bsc Computer science, School of technology and applied science**

🗂 CERTIFICATES

- Certified System Analyst
- Certified web developer
- certified advanced front-End developer (Angular specialization)

🧠 SKILLS

Team management and leadership

Problem- solving abilities

communication skills

📁 PROJECTS

Talent Track (Job Management System)
The Job Portal System is a comprehensive platform designed to connect job seekers with employers, streamlining the recruitment process. Key features include
•User Accounts: Separate registration and login for job seekers and employers, allowing personalized experiences.
•Job Listings: Employers can post job openings with detailed descriptions, requirements, and application deadlines, while seekers can browse and filter listings by various criteria
. •Application Management: Job seekers can submit applications, upload resumes, and track their application status, while employers can manage and review applicants efficiently.

•Search Functionality: Advanced search and filter options enable users to find relevant job opportunities or candidates quickly.
 •Notifications: Email and in-app notifications keep users informed about new job postings, application status updates, and messaging.
 •Admin Dashboard: A centralized dashboard for administrators to manage users, job postings, and site content effectively.
•Analytics and Reporting: Tools to provide insights into user engagement, job posting performance, and overall system usage. By building this Job Portal System, we aim to create a user-friendly platform that enhances the job search experience for seekers and simplifies recruitment for employers, ultimately fostering successful job placements.

🏅 AWARDS

figma
- Bulit fully Responsive & interactive UI using angular HTML, CSS3 ensuring compatibility across multiple devices & browers
